

AUSTRALIAN MADE

Manufacturing in Australia – Solutions

1. During World War I (or 1914-1918). Importing products during the war was difficult, so we had to start making more at home.
2. B
3. General Motors and Ford set up car manufacturing plants in Australia because it was cheaper to make the cars here than import them.
4. The global economic depression.
5. Two items from the following:
 - In 1935, BHP took over the Port Kembla steelworks of Australian Iron and Steel Ltd.
 - In 1937, General Motors Holden built Australia's first all-steel welded car body at its new plant at Fishermen's Bend in Melbourne.
 - Ajax Pump works was built at Tottenham (Vic).
 - Patience and Nicholson started making drills at Maryborough (Vic).
 - Australian Pulp and Paper Mills Ltd started making writing and printing papers at Burnie (Tas) using Australian hardwoods.
 - Rheem started making water heaters.
6. D
7. Tariff
8. To support the Australian manufacturing industry we can buy Australian made or grown products whenever we can.
