

# HOT AIR BALLOONS

## Hot Air Balloon 2

What you will need:

- one blown up balloon
- four pieces of string, about 10cm long
- one small yoghurt container
- sticky tape

What to do:

1. Stick the pieces of string onto the balloon, evenly near the end where the balloon is blown up.

2. Decorate the yoghurt container to make it look like a balloon basket.

3. Stick the other end of the string into the inside of the yoghurt container.

You have now constructed a model of a hot air balloon!
