Make a Christmas Tree

What you will need:

- A Christmas tree template

- Things to colour the tree *(e.g. pencils, crayons, textas, paint etc.)*

- A piece of card or cardboard *(the same size as the Christmas tree template)*

- Scissors
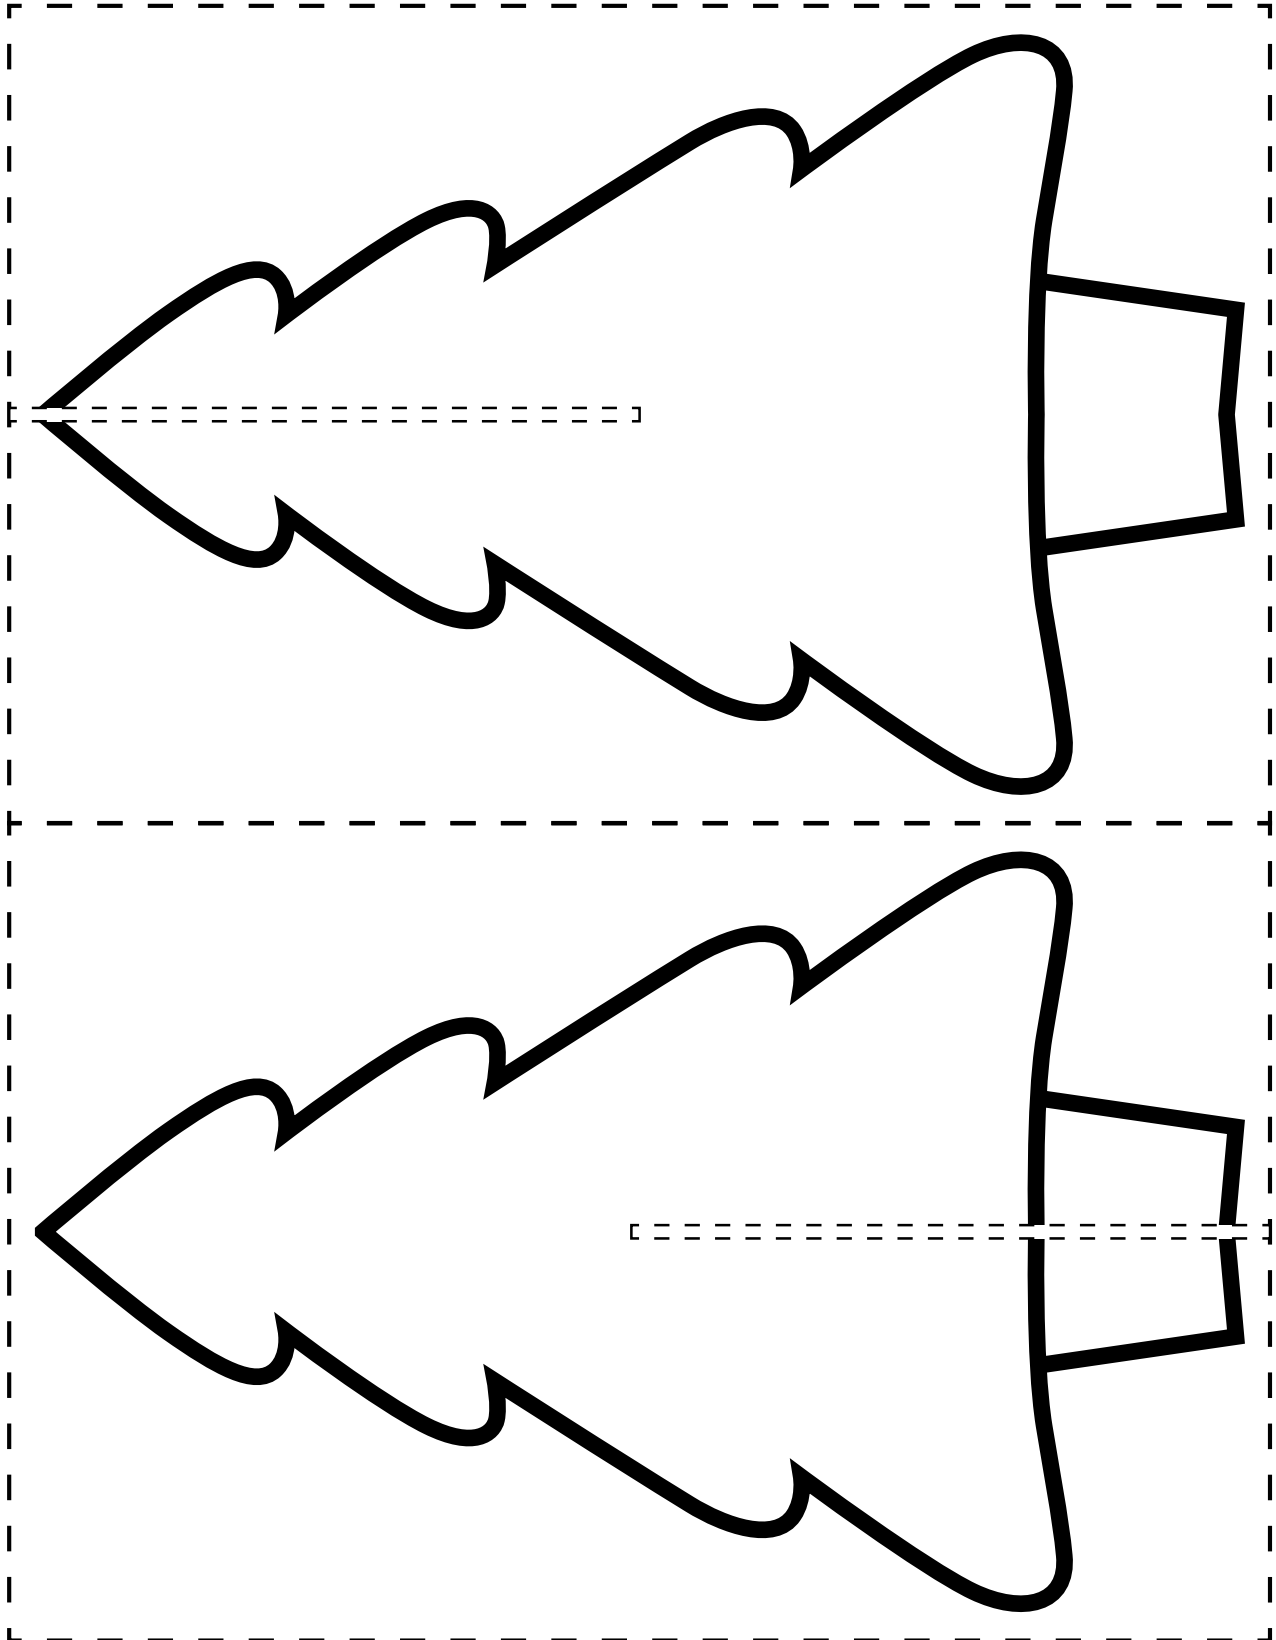

- Craft glue or a glue stick

Instructions

1. Colour in the two parts of the Christmas tree.
2. Glue the Christmas tree template on to a piece of card or cardboard.
3. Cut out each Christmas tree, but do not cut down the dotted line yet.
4. Now cut a slit in each part of the tree using the dotted line as a guide.
5. The thickness of the card or cardboard you have used will determine how wide the slit needs to be *(thicker card requires a wider slit)*.
6. Slide the two pieces of the tree together. The length of the slit may need to be adjusted to enable the tree to stand unsupported on a table.
7. Add some more decorations to the tree if you wish.
