

MOTHER'S DAY

Quilling card

What you will need:

- Several A4 sheets of coloured cardboard or paper in various colours. Light (or pastel) complementary colours work best.
- Paintbrush with a thin handle (to coil paper around)
- Sticky tape
- Glue (white glue or glue sticks)
- Scissors

Instructions

1. Choose a colour for your Mother's Day card. Fold the selected A4 sheet in half to make a greeting card. Glue a smaller piece of white paper to the inside of the card to write your greeting.
2. Cut two strips of card (both the same colour) measuring 1 cm wide and 20 cm long. Use these strips to make a heart shape on the front of the card. Secure the two meeting points with tape. Use some small pieces of tape around the heart secure it to the card.
3. Choose three colours to make coils. Cut 1 cm wide strips of each colour. Wrap the strips around the thin paintbrush handle to make small, tight coils.
4. Coat one side of a coil with white glue or a glue stick and place it in the heart, starting in the top left.
5. Repeat with the remaining coils, mixing up the colours, until your heart shape is full of coils. Put aside to let the glue dry.
6. Write your greeting.

Your card is now finished.
