

RENEWABLE ENERGY IN AUSTRALIA

Renewable Energy in Australia – Comprehension Solutions

1. Teacher check
2. Renewable energy is any **form** of energy that is **produced** using **natural** resources that are constantly replaced.
Non-renewable energy sources are those that rely on ‘finite’ resources such as coal, **oil** and gas. These are **finite** as they will eventually run out and are not **replaced**.
Burning coal, oil and **gas** causes **harmful** gases, such as carbon dioxide, to be emitted into the atmosphere which is **contributing** to global warming.
3. Sentences (teacher check)
Solar thermal
Solar photovoltaic
4. ydwprohoer = hydropower
btrunei = turbine
entegraor = generator
ehraltm = thermal
5. Teacher check.
