

SEASONS

Seasons wheel – blank

Follow these instructions to make a seasons wheel.

What you will need:

- Seasons wheel template (on pages 2 and 3)
- Scissors
- Coloured pencils
- A split pin

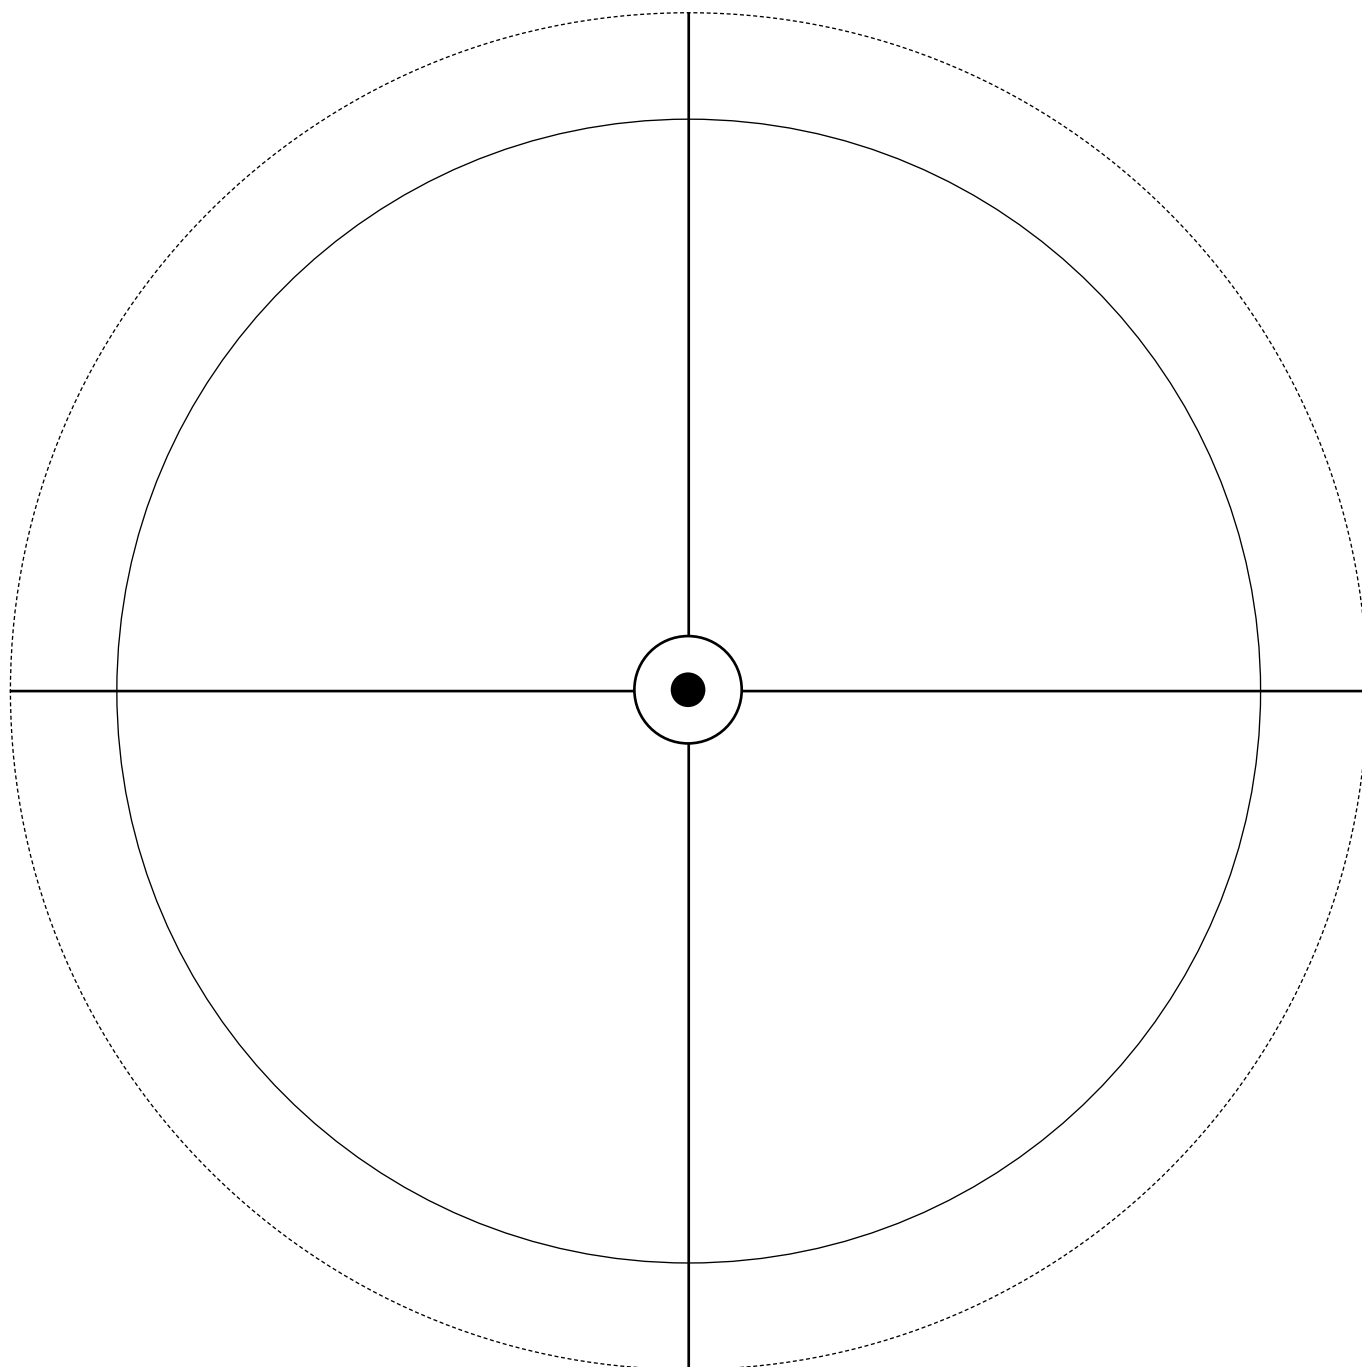

What to do:

1. Cut out both of the circles.
2. On one template you will need to cut out a triangle shape as shown.
3. Write a season name in each quarter of the template and draw a picture that matches the season.
4. Write the months that go with this season in the space on the edge.
5. Poke a hole through both pieces (where the black dot is). You might need an adult to help you with this.
6. Push the split pin through both pieces of the template to hold them together.
7. Open out the 'legs' of the split pin.

Now your seasons wheel should spin to show you the season and the months.
