

SEASONS

Seasons wheel

Follow these instructions to make a seasons wheel.

What you will need:

- Seasons wheel template (on pages 2 and 3)
- Scissors
- Coloured pencils
- A split pin

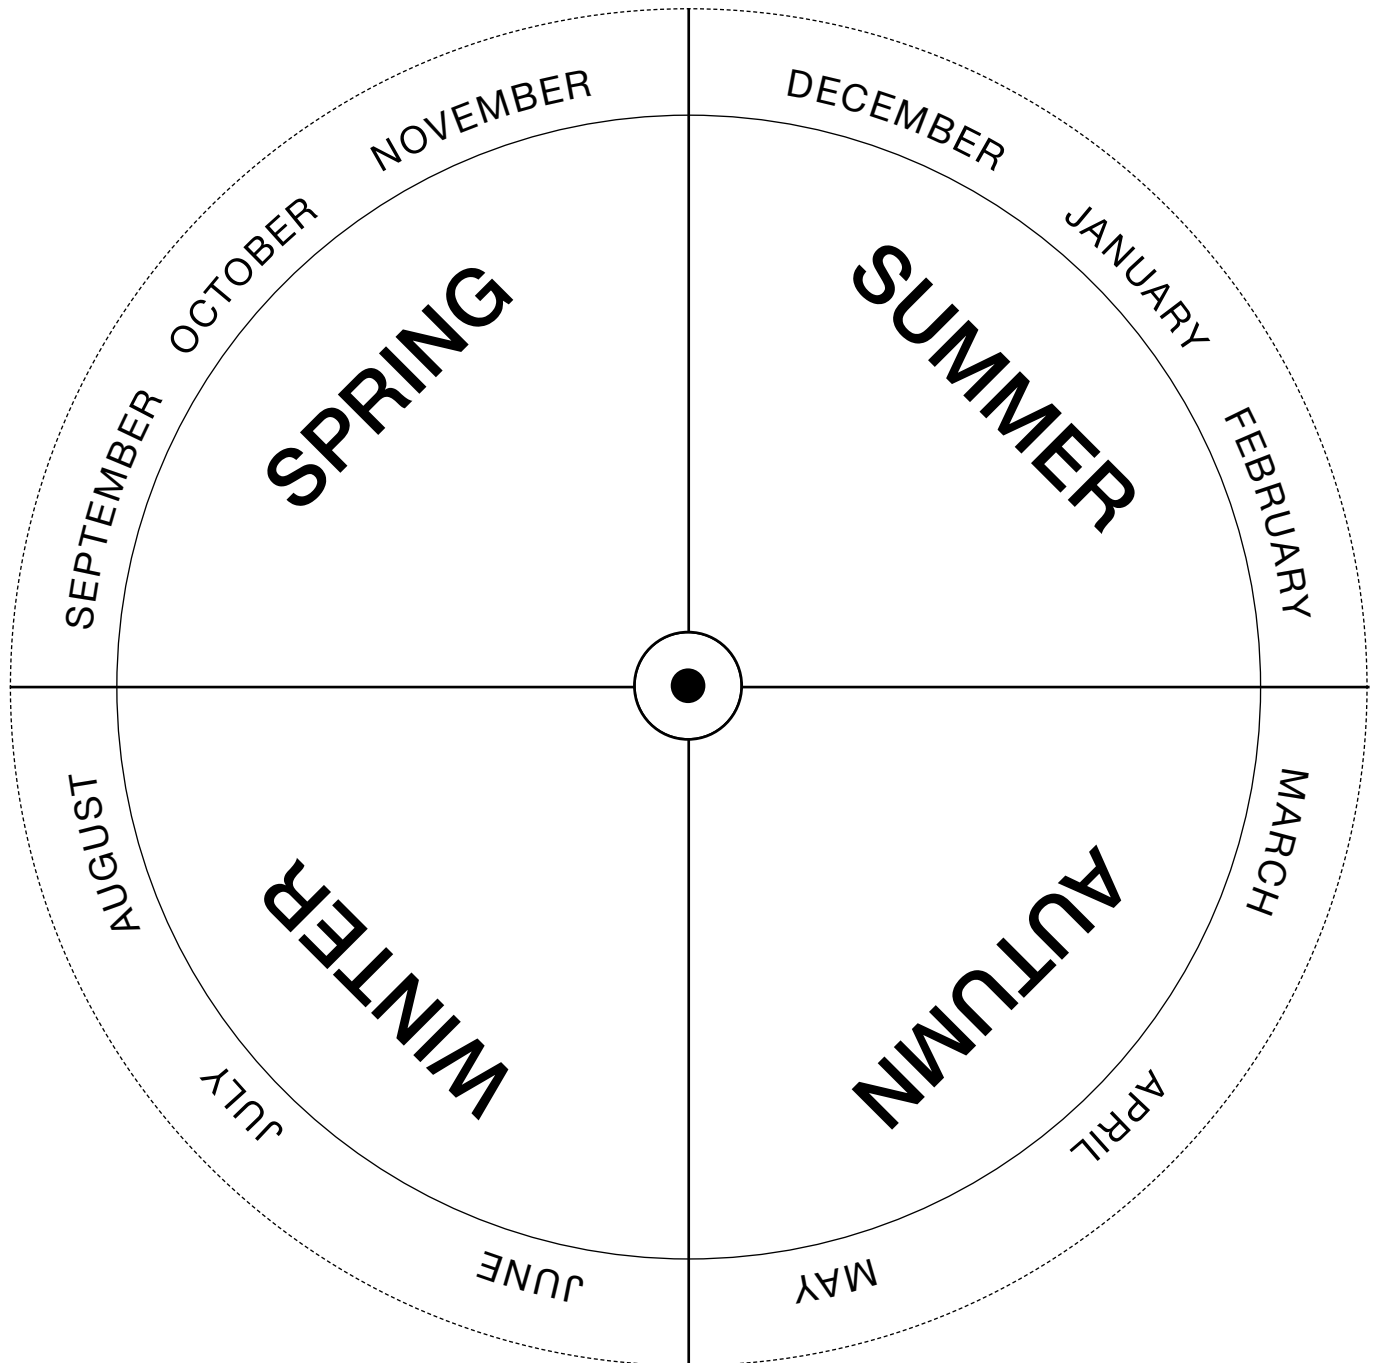

What to do:

1. Cut out both of the circles.
2. On one template you will need to cut out a triangle shape as shown.
3. Colour them in.
4. Poke a hole through both pieces (where the black dot is). You might need an adult to help you with this.
5. Push the split pin through both pieces of the template to hold them together.
6. Open out the 'legs' of the split pin.

Now your seasons wheel should spin to show you the season and the months.
