

TEMPLATES

Make a basket 2

Follow these instructions to make a basket.

What you will need:

- basket template (printed onto thin card will make the basket stronger)
- scissors
- hole punch (or pencil)
- string
- coloured pencils (optional)

What to do:

1. Cut out the basket template following the solid black line.
2. Colour your basket (if you wish).
3. Make a crease along each of the black dotted lines.
4. Make a crease along the lighter grey lines, but make sure this fold is in the opposite direction.
5. Use a hole punch or a pencil to make a hole in the spots marked with an oval.
6. Assemble your box by folding the sides up, creating an indent where the small grey lines crease and folding the lid flaps so the holes match up in the centre.
7. After putting your gift into the box close it by passing a loop of string with a knot at one end, though the holes from the inside to make the handle.
