TEMPLATES

Make an angel

What you will need:

- Template (on page 2)

- Scissors

- Glue or sticky tape

- Coloured pencils or glitter to decorate the angel (optional)

Instructions:

1. Colour in or decorate your angel (if you would like to).
2. Cut out the body template, following the solid line.
3. Carefully cut along the dotted lines around the head (stop when the lines stop – don't cut the head out completely).
4. Fold the head forward.
5. Bend the body into a cone shape so that the grey flap sits completely inside the angel's gown and secure this with tape or glue.
6. Cut out the wing shape and secure them to the back of the angel with glue or tape (hint: you can bend them to make them look flappy).
7. Your angel is now ready to sit on top of your Christmas tree.
