

TEMPLATES

Make a Diamantinasaurus

What you will need:

- Template (on page 2)
- Scissors
- Glue
- Coloured pencils (optional)

Instructions:

1. Colour in your dinosaur (if you would like to).
2. Cut out the body template, following the solid line. Be careful not to cut off the little tab that connects the body together.
3. Fold the body in half along the dotted line.
4. Fold along the dotted line of the tab. Put some glue on the end and stick that to the other side of the body. This will allow the dinosaur to stand up.
5. Cut out the head and neck template.
6. Fold the neck in half along the dotted line and glue the head together at the top.
7. Put glue on both sides of the base of the neck and slide it into the front of the body, pinching the front of the body to secure the head.
